

Aquaflow's aggregate tech
the paver, whilst providin

Aquaflow Porous Paving Blocks are the new, safer, economical and more attractive alternative to traditional tree surrounds.

Aquaflow has been specifically designed to withstand all the abrasive and load factors normally associated with pedestrian traffic as well as being totally UV resistant.

Aquaflow is available in a large range of attractive aggregates and can be specifically manufactured with various aggregates and shapes to suit customer requirements.

With easy installation and low labour costs, Aquaflow Porous Paving Blocks are the viable option for streetscapes and urban design.
